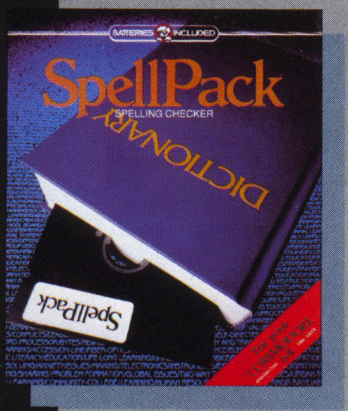
VOL. 2. #1

SPELLPACK



Spelling checker

Spelling errors are embarassing. Even the most careful proofing always seems to miss a few. Now, you can have confidence that every document you produce will be error-free. Thanks to SpellPack. This proofreading program does a much more efficient job in a fraction of the time – and without the eyestrain!

- dictionary program checks an entire document in just 2 to 4 minutes
- rate of checking actually accelerates with the length of the document
- computerized dictionary contains over 15,000 of the most commonly-used English-language words
- you can add thousands more entries, to include specialized terminology from your area of expertise: legal, medical, scientific, educational, as well as brand names and non-English words
- with microprocessor speed, SpellPack compares each word in your document with its internal dictionary
- if a word in your document is not in the dictionary, that word is highlighted right on the screen, in context
- you can correct the word immediately – with a single keystroke
- or, if it is a correctly-spelled specialized term, you can add it to the dictionary, right then and there, with a single keystroke

No more spelling errors, no more tedious proofreading – thanks to SpellPack. Use it with your PaperClip word-processor.

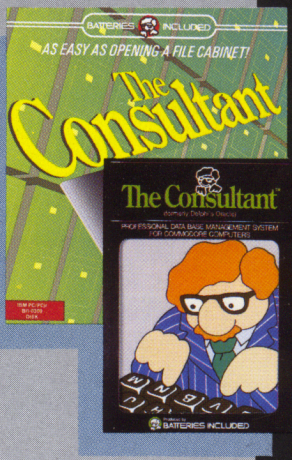
FOR YOUR COMMODORE 64/128

THE CONSULTANT

Database management made easy.

"Combines simplicity with speed and gigantic records. Highly recommended."
MICROCOMPUTERS MAGAZINE

"...capable of very large and complicated searches. A very good system at a very good price."
– TPUG MAGAZINE



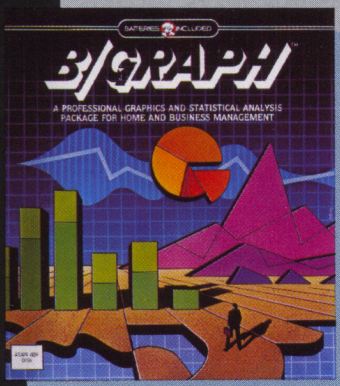
The Consultant makes professional database management as easy as opening a file cabinet. But you get sophisticated features and capabilities found in much more expensive programs. Store, sort and retrieve large amounts of information with a few fast commands. Built-in application templates save you time, with file formats that are already layed-out and ready to use. All you have to do is enter data. Or lay-out your own custom files – it's simple, and the possibilities are virtually unlimited.

- totally memory-resident program, for maximum flexibility and speed even with a single disk drive
- 10 built-in templates for the most-needed database functions: Inventory, Budgets, Mailing Lists, Catalogs and many more
- extensive macro capability – define and store a sequence of commands, then execute them anytime with a single keystroke
- change your file formats anytime without having to re-enter data
- max. field size: one full screen of data
- max. record size: 99 fields, or 9 pages
- max. number of records per database: 65,588
- keyed field access speed: 1/10 second to access any position in a file
- sorting speed: 4 seconds per 1000 records
- five search operators – Equal To, Greater Than, Less Than, Not Equal To, Match Anywhere – plus Wild Card
- totally flexible relational reporting – call up any item from any Consultant datafile and insert in a report
- full screen editing; built-in four-function arithmetic calculator
- one-key access to on-line help files
- no need for courses, books, other software or knowledge of computer languages

SOME FEATURES MAY VARY WITH EACH COMPUTER SYSTEM

FOR YOUR IBM-PC OR PC-COMPATIBLE, COMMODORE 64/C128 AND ENHANCED C128 VERSION

B/GRAPH



Graphics/charting and statistical analysis.

"The best graphics and statistical analysis package available...very easy to use."
– ANALOG COMPUTING

"The graph features alone would make B/Graph a good buy. The addition of a sophisticated statistical package makes it superb."
– INFOAGE

Serious business graphics software is finally here. Give your data maximum impact: analyze it, graph it and chart it with B/Graph. Easily done, and the results are spectacular.

- graph up to three factors with 100 data points each
- pie charts, 2 and 3 dimensional bar charts, line and area graphs – just some of the many exciting possibilities at your command
- convert instantly between graph types, without re-entering data – a real time saver!
- flexible graphic control features include full screen editor, multiple graph and grid scaling, automatic labelling, overlays and automatic "slide show"
- statistical analysis functions include standard deviation, variance, Chi-square, regression analysis, function plotting, and many more
- B/Graph reads and writes to VISICALC DIF files; enter data with VISICALC, then graph it with B/Graph; or analyze data with B/Graph, and then use VISICALC to perform "What If?" projections
- store your finished work as datafiles or as high-resolution screens
- smooth, natural user interface is easy to learn, even with no prior computer experience
- clear, comprehensive documentation supported by step-by-step tutorial
- works effectively with most major graphics printers, printer cards and interfaces
- the ideal visual presentation tool for sales, marketing, forecasting, accounting, management – and for educators and students

FOR YOUR ATARI OR APPLE II+/e/c

CAL◊KIT

Solves home and business number problems in a fraction of the time.

"...the very best program of its type...a powerful tool that's not overpowering...the perfect spreadsheet for the home user. We recommend CalKit highly."
– COMPUTER ENTERTAINER

Balance your chequebook in seconds. Develop accurate home and business budgets. Estimate how much paint you'll need to redecorate. Just a few of the many math problems you can solve in seconds, using CalKit with your Commodore 64/128.

This simplified, streamlined spreadsheet program includes over 30 ready-to-use application templates on one disk. The formats are already set up, the calculations are pre-programmed. All you have to do is punch in numbers – CalKit does all the calculations, instantly. It's a completely self-contained problem-solving toolkit. And it's so easy to use.

- built-in application templates include Check Book, Home Budget, Installment Payment, Income Tax, Business Start-Up, Balance Sheet, Stock Portfolio, Materials Estimator, and many more
- 26 rows × 96 column worksheet
- unique "independent variable column width" feature accomodates very large numbers
- "What If?" capability: change any number on the worksheet, and see how that change effects all the other numbers – CalKit performs the necessary calculations in an instant
- for example, see what happens to your loan or mortgage payments if interest rates change
- you'll be using CalKit's built-in worksheets within a couple of hours, right out of the box – no programming or math skills required
- total flexibility for experienced users: design your own customized worksheets to solve specialized problems
- on-screen help menu, prompts, simple English commands, and a tutorial on each application template

POWERFUL SOLUTIONS + EASE OF USE +
LOW LOW COST = CALKIT!

FOR YOUR COMMODORE 64/128

HOMEPAK

"...inexpensive, powerful, integrated software. As such, HomePak is the winner of InfoWorld's Best Buy Award."

– INFOWORLD MAGAZINE

The easy answer to your three most important software needs.

"This three-in-one program is a bargain...one of the finest values on the market. Performance: excellent. Value: excellent

– FAMILY COMPUTING MAGAZINE

HomeTerm telecommunications puts you in touch with bulletin boards and public databases. HomeText is a basic word-processor with advanced features. HomeFind is a simple, streamlined database manager. All three HomePak programs reside in memory together – it's easy to transfer data and perform integrated tasks. For example: take a mailing list you've stored in HomeFind and print mailing labels using HomeText – then send the list to a friend via HomeTerm.

1. HOMETERM TELECOMMUNICATIONS MODULE

- utilizes X-Modem protocol, a virtual standard for many on-line services
- capture buffer allows downloading files of virtually any length
- save incoming text to disk, or send to printer for print-out
- create and receive text simultaneously using Text Edit Window
- extensive macro facility
- built-in screen clock shows time and money spent since logging on to a service
- smooth, natural user interface and on-screen help files

2. HOMETEXT WORD-PROCESSOR

- over 20 full-screen editing and formatting features including word-wrap, justification and automatic paging
- "move & copy" large block of text quickly
- Page Preview mode shows your text exactly as it will appear on the printed page
- allows most major printer functions including boldface, underlining and extended characters

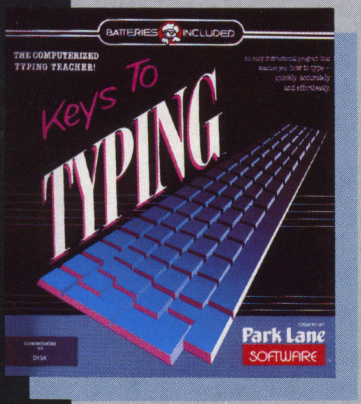
3. HOMEFIND DATABASE MANAGER

- a streamlined information management program you can learn quickly and operate easily
- natural English-language data entry and retrieval method includes all the key searching and sorting features, flexible queries and extremely simple output commands

SOME FEATURES MAY VARY WITH EACH COMPUTER SYSTEM

FOR YOUR IBM-PC, Jr OR PC-COMPATIBLE, COMMODORE 64/128, APPLE, ATARI, ATARI ST.

KEYS TO TYPING



40 words a minute in 32 easy lessons

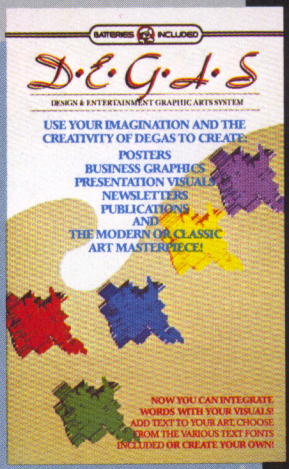
Learn to type at your own pace, in the privacy of home or office. Ideal for students of any age. For business people who need computer typing skills but are short on time. For people re-entering the workforce who need a fast refresher. You'll soon be up to 40 words a minute – quickly and effortlessly, with this simple tutorial program.

- 32 step-by-step lessons to reach grade 10 proficiency (40 words per minute) – you may not even need every lesson
- all 32 lessons based on the proven instructional techniques used by typing teachers
- over 400 exercises, all based on successful typing manuals
- designed by educators and programmers working together, to ensure fast effective learning
- tested in school: students learned in 6 weeks what otherwise would have taken two years
- no computer knowledge needed, just basic reading skills
- each lesson has three parts: 1. introduction of new keys; 2. exercises; 3. games to reinforce learning
- Lesson #1 explains the program and how to use its menu and help screens
- no commands to enter – just move the cursor; the only keyboarding you do is to practice typing
- if you make an error, the display shows you where to point the cursor in order to solve it
- get immediate help or return to main menu with one keystroke

FOR YOUR COMMODORE 64/128

DEGAS

"A Graphics Masterpiece"
– ANALOG MAGAZINE



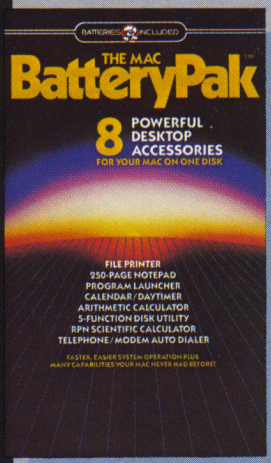
"Allows you to take full advantage of your ST's stunning graphics capability, to produce nearly anything you can imagine."
– ANALOG MAGAZINE

Business graphics, posters, presentation visuals, newsletters, publications – even works of art, modern or classic. Create them all right on your ST screen with DEGAS – it's easier than pencil and paper, and the results are spectacular.

- Use DEGAS to exercise your creative imagination, for business or pleasure.
- includes the full range of graphic design tools, plus you can create your own brushes, colors, fill patterns...and more
- built-in palette of over 500 colors to choose from – or create your own special shades
- powerful TEXT capability lets you combine words and pictures to create effective business communications
- choose the ideal letter size and weight from the built-in DEGAS text font – or design your own font
- to DRAW simply move the ST mouse – it's your paintbrush: 15 built-in brush patterns, from hairline to broad stroke – or create your own
- quickly ERASE a portion of your drawing, or the entire screen
- draw an accurate LINE, CIRCLE, DISK, BOX and FRAME by simply setting two points – DEGAS does the rest automatically
- RAYS and K-LINE draw a series of connected lines with 100% geometric accuracy
- FILL any outline with a pattern, instantly: 60 pre-designed patterns, from grids to dots to solid color – or design your own
- advanced graphic design features include MIRROR, SHADOW, AIRBRUSH, MAGNIFY, MOVE and COPY
- one command saves your DEGAS creations to disk
- works with the most popular graphics printers – you can even print-out DEGAS color graphics as shades of grey on a one-color printer
- works in all three Atari ST resolution modes

FOR YOUR ATARI ST.

BATTERYPAK



NEW! 1.1 Version with 9 Ways To Supercharge Your Macintosh

"BatteryPak: a 'wish list' of desk utilities."
– INFOWORLD MAGAZINE

Nine powerful accessories/tools save you time and keep you organized. System productivity tools boost your Macintosh's operating speed and make many tasks easier to execute.

1. Calendar with Daytimer: keeps track of appointments, deadlines, family occasions and important dates. Includes global search command that finds the date of a specified appointment, plus all occurences of that type of appointment.
2. 250-page Phonepad: stores and retrieves phone numbers instantly. Includes mini-wordprocessor for taking notes and free-form database for referencing them later.
3. Automatic Modem/Phone Dialer: automatically dials any phone number listed in Phonepad or Calendar.
4. Scientific Calculator: Hewlett-Packard RPN notation and all the functions needed for sophisticated, professional-level calculating. Includes statistical, logarithmic and trigonometric functions, polar-rectangular conversions.
5. RPN Calculator: simplified and streamlined for everyday calculating. Includes continuous memory and full display control.
6. 7-function Disk Utility: lets you perform quick and easy disk maintenance from within any application. Trash, Copy and Rename files. Change the default drive. Access disk or file size/date information. Do it all without the Finder.
7. High-Speed Launcher: transfers you from your current program to any other program – without going through the Finder. Automatically loads or prints a specified document from the incoming program. One-button system re-boot.
8. Print Text: printout draft-quality hardcopy of any document or program while you continue working on your Macintosh. Hardcopy can include tabs, page headers, line numbers, compressed print.
9. Windows Listing: gives you a complete listing and easy access to every window stored in memory. Call up the listing, select the title, and that window is automatically brought forward.

FOR YOUR MACINTOSH.

A FIVE-MOUSE RATING – THEIR HIGHEST – FROM MACUSER MAGAZINE.

HOMEPAK for the MAC

E-mail, bulletin boards, CompuServe, Delphi, The Source, Dow Jones – just some of the many systems your Macintosh can communicate with thanks to HomePak. It's really a three-in-one program, but HomeTerm telecommunications module is the star of the show – a masterpiece of hidden power that does most of the work for you. You also get HomeFind database manager and the Apple "MDS Edit" text editor on the same HomePak disk. Convenient tools to have at your fingertips, when you're sending or receiving data.

HOMETERM FULL-SCALE TELECOMMUNICATIONS PROGRAM

- Compatible with most popular modems.
- Powerful user-defined Macro capability – one command logs you on to your favorite bulletin board or database service.
- Store up to 10 Macros and 5 phone numbers per document. When you recall a document, the communication instructions are already in place.
- Download (receive) and upload (send) direct to disk – no buffer to slow you down.
- Disk-based storage means you can transfer files of virtually unlimited length.
- Features X-modem protocol – the virtual standard for Macintosh communications.
- Allows transfer of X-modem files or plain text files, and automatically recognizes which protocol is being used.
- On-line conference capability – get friends and associates together using your Macintosh.
- Edit window for composing messages before you send them – avoids embarrassing errors.
- Built-in time clock shows how long you've been logged onto a service; plus a money clock keeps track of how much money "connect time" is costing you.

BONUS: HOMEFIND DATABASE MANAGER

- Helps you manage information you've received via HomeTerm.
- Natural English-language data entry and retrieval system allows simplified electronic filing – no "fields, forms or records."
- Slick report composer produces presentation-quality custom reports using data you've stored.

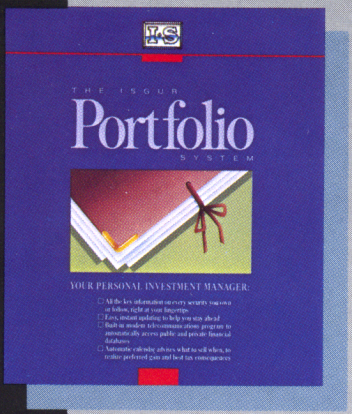
THE ISGUR PORTFOLIO



Designed by Lee Isgur, top Wall Street financial analyst and Vice-President of PaineWebber, New York.

A windfall for both casual investors and full-time professionals.

The Isgur Portfolio System (IPS) compiles and manages all the information you need to make sound investment decisions. It really does all the work for you – and you don't have to be computer literate to use it.

IPS takes the latest market data from on-line services such as Dow Jones and instantly updates your personal portfolio. To keep you on track. Save time. And reduce error. Then use the powerful IPS review and analysis tools to see your portfolio in many different ways, in order to isolate the best buy-and-sell decisions. Review your holdings by portfolio, or by security – a real advantage for people who manage multiple portfolios. The end result? You spend less time and make more efficient decisions.

- You operate IPS via the super-easy, GEM user interface – simply point the cursor at the command you want to execute
- Update your portfolio immediately – the built-in IPS telecommunications facility is pre-set to access Dow Jones, CompuServe and The Source
- I*S TALK, one of the most advanced full-scale telecommunications programs available, is included as a bonus in the IPS package
- Automatic Memos alerts you to significant dates – for example, when a stock is about to go long term
- You can set IPS to alert you if a security hits a specified high or low price
- IPS works with a dual floppy or hard disk – the number of portfolios/securities IPS can manage is limited only by disk space
- "To Raise Money" feature suggests what to sell in order to raise a specified sum of money, while realizing the best tax consequences and maintaining the optimum diversification

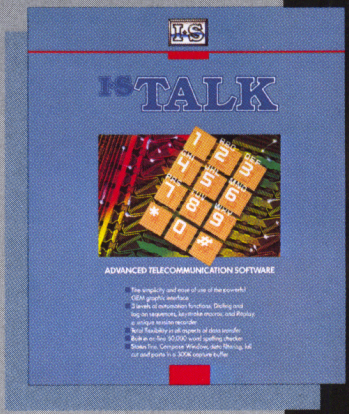
SYSTEM for investors

- "Splits/Dividends" feature automatically takes care of all the time-consuming record-keeping associated with stock splits and dividends
- "Cash and Margins" keeps track of your liquidity situation, including the effects of changing interest rates
- "Security Values" mode lets you review all holdings of a specified security – from all your portfolios, or a group of selected portfolios
- "Portfolio Values" mode lets you review all your portfolios, a selected group, or just the current portfolio you're working on
- Sort and display your portfolio information according to many criteria, including short term vs. long term holdings
- Display gains or losses as a dollar value or as a percentage; one command displays Actual gains vs. Annualized gains
- Instant currency conversions, for as many currencies as you want
- "Suppose?" feature instantly calculates and displays the effects of "What if?" changes on your portfolio
- "Realized Gains/Losses" shows your entire year-to-date on one screen, with an itemized breakdown of every transaction – ideal for tax time
- "Graph Values" automatically produces a bar graph comparing the performance of different securities
- "Graph Diversification" automatically produces a pie chart showing how balanced your holdings are – and suggests what's needed to achieve complete diversification
- One command prints a formatted report containing the information on any IPS screens
- "Replay" mode lets you record every move you make – including user-defined prompts – to give you a virtual "turnkey" system

FOR IBM-PC/PC-COMPATIBLE COMPUTERS WITH GRAPHICS CAPABILITY, ATARI ST, AND AMIGA

I*S TALK

Total telecommunications



The program designed to make on-line communication easy and enjoyable. Experienced users will delight in the multitude of advanced features. New users will delight in how simple it is to access the expanding universe of on-line databases, public services like Dow Jones and CompuServe, E-mail, bulletin boards and computer to computer conversation.

■ GEM user interface lets you work intuitively, thanks to drop-down menus, windows and other visual aids – it's easy to find the feature you need.

■ Exceptionally large capture buffer – 300,000 possible bytes in memory, unlimited capture if spooled to disk.

■ Total flexibility. Upload and download to any configuration of devices – disk to modem, disk to screen, modem to disk, modem to printer, memory to modem...

■ Process incoming text as if you're using a word-processor – edit any portion of text, save to disk, print it...all from within I*S Talk.

■ Call up a three-line Compose Window for easier, error-free on-line editing.

■ Built-in 50,000-word real-time spelling checker virtually eliminates spelling errors in outgoing text.

■ Three levels of macros:

1. Key-pad macros let you save frequently-used command sequences or text, then transmit them with one keystroke.

2. Fully-automated log-on lets you access different on-line services without entering ID's and passwords every time.

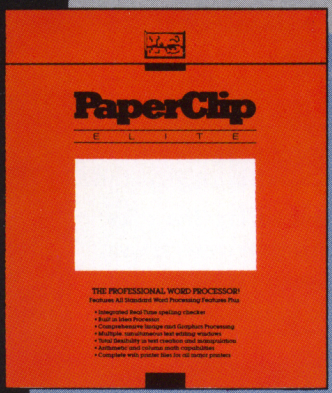
3. Replay mode records every entry you make during an on-line session – including prompts and instructions. Now you have a virtual turnkey system that someone else can use.

■ Built-in Memo function alerts you if any messages are waiting – or you can leave Memos to yourself.

■ Call up HELP windows at any time, for every major function.

FOR YOUR
IBM-PC OR PC-COMPATIBLE
ATARI ST, AMIGA

PAPERCLIP ELITE



The next-generation word-processor

PaperClip – the #1 best-selling word processor for Commodore, Apple and Atari. Now, the next generation – PaperClip Elite. A must-use for serious word-processing people. All the high-productivity features you've come to expect – plus power and possibilities you've only dreamed of.

■ The GEM user interface – drop-down menus, multiple windows and other visual aids make it easy to work and create.

■ Real-time spelling checker lets you spell-check words, blocks of text, or complete documents as you type.

■ Idea-processing capability lets you quickly re-structure a document. Set headings as you write – the block of text that follows each heading is permanently linked.

■ Simply move your headings around – like a table of contents – until you obtain the best structure. PaperClip Elite automatically re-arranges the blocks of text.

■ Later, recall specific "ideas" from old files, without having to re-enter the entire file. PaperClip Elite lists all your headings in a drop-down window. Select the ideas you want to re-use and the program extracts them for you.

■ WYSIWYG – What You See Is What You Get. The PaperClip Elite screen is an **exact** representation of your final printed page. No surprises, total control. On-screen page format is true and accurate. Boldface printing is clearly displayed as boldface, underlined words are underlined. . .

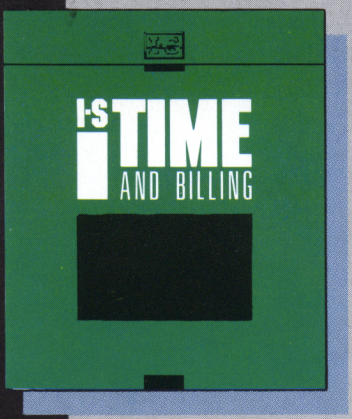
■ Independent linked windows let you create and edit two or more separate columns of text at the same time. Ideal for audio/visual scripts.

■ Now you have the power to fully integrate text and graphics. Produce complete publication layouts, illustrated reports, and much more.

■ Includes a facility to import files created by other word-processing software – you can use your old files with this new program. Nothing is lost, a new universe of word-processing is gained.

FOR YOUR
IBM-PC OR PC-COMPATIBLE
ATARI ST, AMIGA

I*S TIME + BILLING



The Office Management and Billing Program

Doctors, lawyers, accountants, consultants, financial advisors – anyone who charges by the hour will benefit from I*S Time +Billing. This office management program is easy to learn and use, so you start **saving time** right away. And in your business, time is money.

■ Daily Records: you **save** each time you service a client, because I*S Time lets you keep easier and more accurate records. Not only for billable time, but also any disbursements. From photocopies to X-rays – I*S Time records the costs for billing purposes.

■ Automatic Billing And Accounts Receivable: you **save** time every month, because I*S Time automatically generates your client invoices, ready for the mail. The program also prints out a detailed list of your accounts receivable. Information that used to take hours is now instantly at your fingertips.

■ Billing and Breakdowns For Multi-Person Offices: I*S Time will show you and your partners exactly who has spent how much time on which clients, and will generate separate invoices for each professional.

■ Power, Price, Ease-Of-Use: I*S Time + Billing has the sophisticated features and flexibility of similar programs that cost thousands more. In fact, the programmer who designed I*S Time also designed some of the more popular dedicated systems – this is quality software at a fraction of the cost.

■ Features the GEM user interface with drop-down menus, windows and other graphic aids for simplified operation.

■ Use I*S Time + Billing together with our other I*S programs to perform total office management tasks – you do it through the I*S Bridge module which is included.

■ I*S Bridge module is also your electronic message centre – colleagues can send you electronic mail via your I*S Time + Billing program.

FOR YOUR IBM PC OR PC COMPATIBLE, MACINTOSH, ATARI ST AND THE AMIGA.
